

Tie a knot about 1-inch from tag first, then tie the tag onto one of the drawstrings on your bag.

Type or write names on the bottom of the tags. Save the file before printing. Trim around edge of tags as shown by the scissor icons. Use a hole punch to make a hole in the top of the tag. Thread a ribbon or piece of twine through the hole as illustrated above. (Loop the string through hole first then pull the ends through the loop.)
